1.Introduction

The Sports Event Management System (SMS) objective is to provide a mechanism which manages the activity of many *sports at a time. It also manages the selection activity of students to college and to state level. The users will consume less amount of time when compared to manual paper work through the automated system. The system will take care of all the servicing activity in a quick manner. Data* storing is easier. It will be able to check any report at any time.

1.1 Objective of the Proposed System

- To find out the application of sport management system.
- To provide information and manage the system regarding sport events of the university.

1.2 Problem Definition of the Proposed System

The purpose of this request is to provide detail how this system manages the activity of much sport at a time. It also deals with the selection of student at colleges, university and even at state level. This system will provide the serving activity in quick and easy manner. It will consume less amount of time as it is based on automatic system.

2. Tools and Technology used

- HTML
- CSS
- JAVA SCRIPT
- PHP
- XAMPP

3. Design & Database

In front end html,css and java script are used.For Back end Php is used.For database Mysql is used.

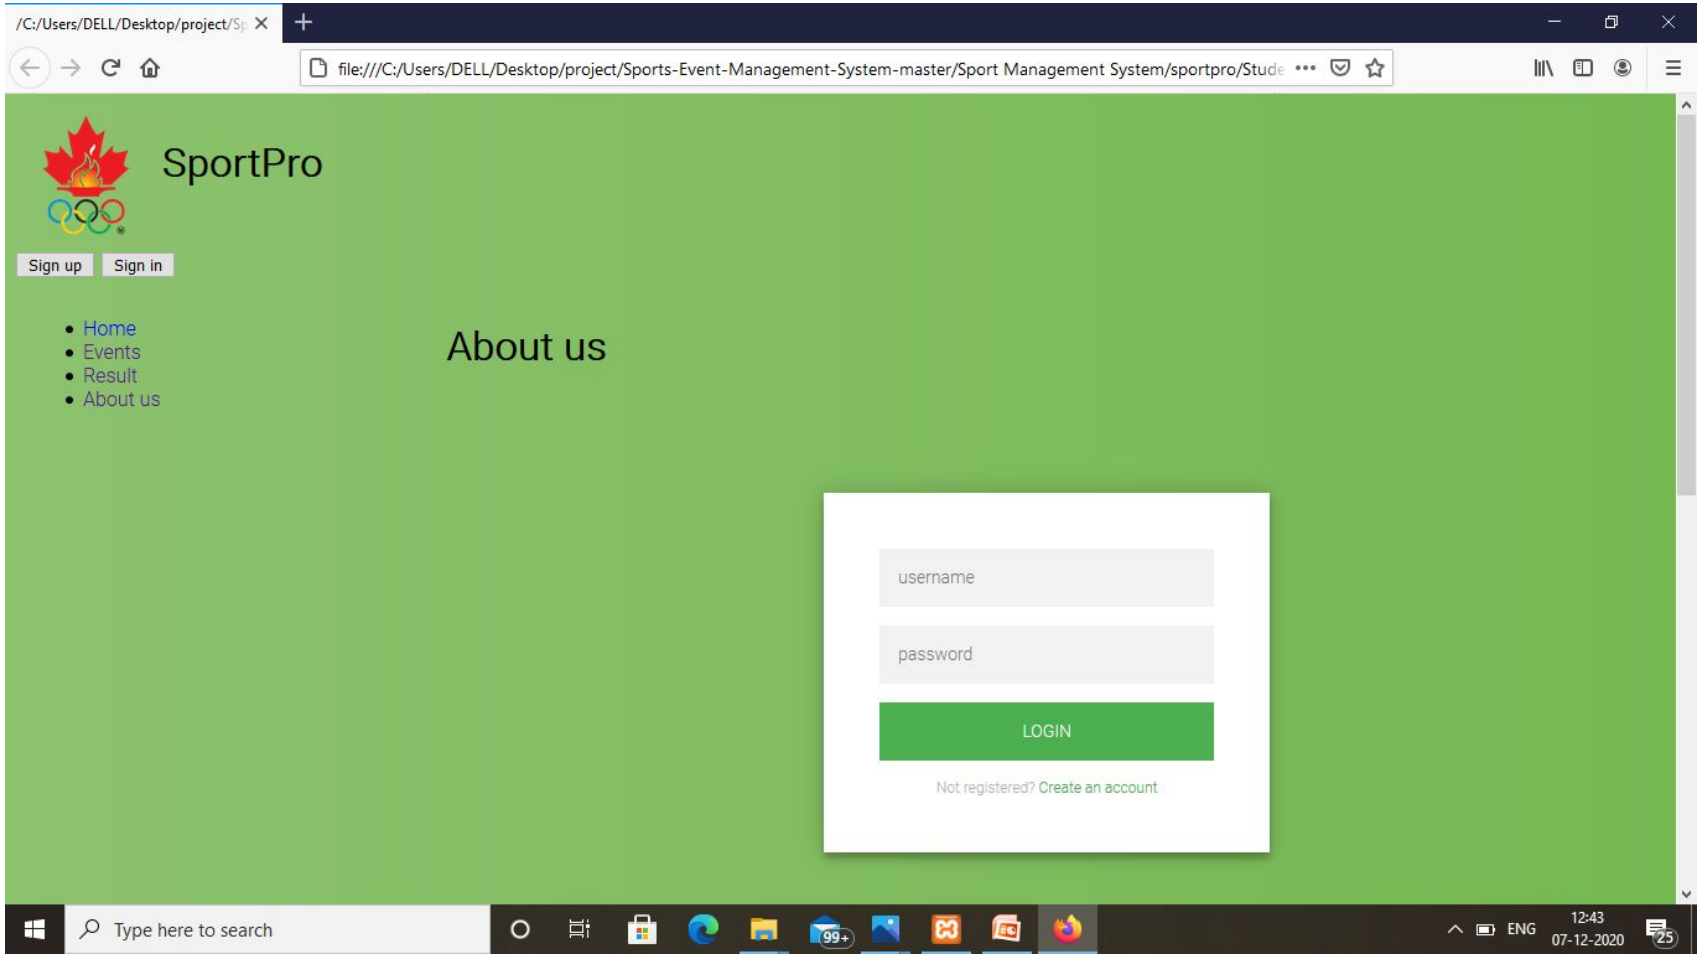
STUDENT PART

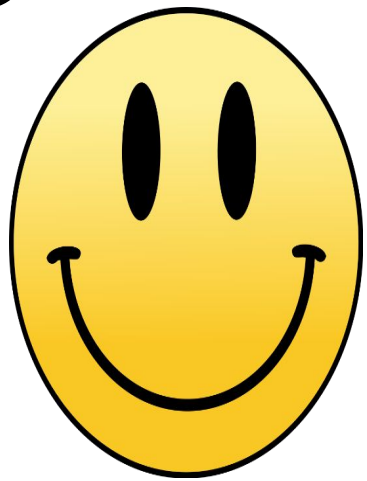


5. Scope of the Proposed System

The **Sports Management System(SMS)** manages the activity of many sports at a time. It also manages the selection activity of students to college and to state level. The users will consume less amount of time when compared to manual paper work through the automated system. The system will take care of all the servicing activity in a quick manner.

6. Conclusion

Sports management system is not only rewarding but it also helps the programmer to quickly organize the sports events and lists in short interval of time. I personally see this as a great way to find even more information for my topic. . It will be able to check anything related to sports at any time. Paper work and manual work is reduced through this system. The system is user friendly and easy to use.

I hope that the user would not only enjoy this system, but also get satisfaction from finding how each and every feature of sports management is implemented.


Thanks for watching..
